About This Game

Game Introduction

Mobile Empire is a PC simulation game based on "manufacturing mobile phones", with a high degree of freedom. You will play as an entrepreneur back in 2001. You acquired the initial capital from a mystery investor because of your unique vision and created a technological enterprise that may change the world. The game starts from 2001 and ends in 2035, during which you will start with old school smartphones in the early R&D stages, progressing until AR smart glasses can be independently used. During the 35 years, you will experience, witness, and promote the magnificent development process of smartphones. You have the chance to develop your company into the world's number one technological enterprise.

Core gameplay

The core gameplay of Mobile Empire is to research and develop better blueprints, upgrade awesome technologies, create stronger teams, make better mobile phones, earn more profits, and repeat. "How to use employees" is the essence game. You can assign employees to proper positions according to their abilities, talents, and skills to realize their maximum potential. The cooperation of employees will also trigger limit break effects, which is a new mechanism that enables players to break through technological limitations and create miracles.

Unique theme

Currently, Mobile Empire is probably the only PC simulation game based on "manufacturing mobile phones". You will have the

chance to create miracles and develop your little-known company into a global technological empire.

Innovative competition experience

In order to simulate a real business environment, lots of competitors will be constantly updated. Players may cooperate with them for joint development or poach talents from them.

Massive amounts of random events

In order to create a better "sense of the world", a great deal of industrial events, world events, crisis events, lucky events, employee events, and news interviews are set in this game for you to make your own choices.

Bountiful blueprints

The game includes 65 different cell phone blueprints and more than 100 cell phone appearances from 3x3 keypads to full-screen and folding screens, and even includes futuristic AR smart glasses. Bountiful blueprints are yours to explore.

Vast technologies

In this game, there are many technologies and accessories are available for upgrade. In addition, with adequate funds, you can even research and develop CPUs with superior performance and experience better operating systems. Customized naming is also supported.

Creative persuasion system

In terms of talent recruitment, the game provides a very distinctive "persuasion" system. To acquire the top talents, you need to use different communication skills to persuade the recruits according to their personalities.

Other contents for you to explore

The game also includes credit ratings, company acquisitions, employee development, outsourcing mode, intelligence system, company strategies, and more for you to explore.

The only reason anyone should buy this game is if the developer comes round and holds a gun to your head, if this happens absolutly buy it! However if you are not under duress... there is no reason to buy this game... on paper it has potential to be a great game... however the developer had the day off on the day he created this instead leaving his 5 yr old to develop this...

He didnt even try, most of the text in game has been translated using the worst translation tool to be found on planet earth.

It doesnt make sense... Steam? Why is this still on the store?

PanoPainter **[FIX] Oculus Controller** :
HotFix 0.1.9.709

This fixes the Oculus Controller painting continuously. The issue was that the Oculus Controllers have a different value when released, and never reach a perfect 0 when released.

Thanks for reporting this issue which is now fixed, happy painting.. **Windows 7 Fix:**
PanoPainter now runs fine on Windows 7.

Some people with an OS version lower than Win8 had issues running PanoPainter, but **It's now been fixed.**
The software was trying to load a dll that does not exist in 7.

If you have any issue, feel free to reach out and to help me fix it.

Thanks for everyone who takes the effort to help me make a better software.. **Resources:**

Hi everyone,

to get started with PanoPainter you can find the official tutorials here: <https://panopainter.com/tutorial.html>

Brushes

PanoPainter does not ship with a default set of brush presets, yet. So in order to have a nice collection of brushes you can easily import them from Photoshop ABR brushes from your collection or find some good ones like Jama's ink brushes that you can download from <http://jamajurabaev.com/resources/>

To import just click on **File -> Import** and select an ABR file.
